Educating colleagues on climate change renews passion for nursing: focus on Julia Ryder

Choosing nursing as a career grew from Julia's experiences in nature - time outdoors, the healing power of nature, wilderness programs for troubled teens." A few years ago, she began noticing the links between climate and health. For example, as an ER nurse, she sees the effects of wildfires on

her patients. She began talking with her colleagues and provided training at her hospital. She researched hospital sustainability with [Health Care Without Harm](#). She became a [Nurse Climate Champion](#), a joint project between Health Care Without Harm and the [Alliance for Nurses for a Health Environment](#). She joined the [board of Montana HPHC](#) .

“Nurses have been rated as the most trusted profession, which allows us to begin the discussion of climate and health,” she said.

Julia Ryder, RN, BSN, is a registered nurse at Bozeman Health. She lives in Bozeman with her boyfriend and their two dogs, Roamer and Jake. When she is not at work or reading up on climate change, she enjoys teaching yoga, riding her bike, running, and skiing.

Signing on!

Actions by Montana HPHC

Montana HPHC is officially an Affiliate of the [Medical Society Consortium on Climate and Health](#).

We signed on to a [group letter](#) to the EPA from the US Climate and Health Alliance regarding amendments in methane emission standards.

We joined the [U.S. Call to Action on Climate, Health, and Equity](#)

Our Allies!

Allies of the MTHPHC are health and science organizations that are aligned

with our [Vision and Mission statements](#) regarding the health threats of climate change and the health benefits of solutions.

Air Pollution and Brain Damage

Cognitive delays, anxiety, depression, hyperactivity, autism, and dementia have been linked with traffic-related air pollution, particulate matter and/or Polycyclic Aromatic Hydrocarbons from the burning of fossil fuels.

Lowering your Carbon Footprint

Decreasing Junk Mail

The average American receives 41 lbs of junk mail a year and 44% of it is thrown away and not recycled. This is 80-100 million trees a year, and a wasted 28 billion gallons of water each year.

Solutions:- Tell credit cards not send more offers, - email companies personally and ask them to stop sending you mail, - go to <http://www.ecocycle.org/junkmail>
